Q&A

- Q: Can one shade program on multiple channels?
A: No, one shade can only program on one channel
 - Q: Can multiple shades program on ONE channel?
A: Yes, only on channel "0". Channel "0" is designed to control shades which connect to this remote. The maximum controlled quantity is 15 shades.
 - Q: Can this new remote connect to old motor?
A: Yes, programming needs to follow by old motor instruction, but no clock and alarm setting on mini Simple Touch.
 - Q: Can old remotes (1 channel and 5 channels) connect to new motor?
A: Yes, just followed by new motor program instruction. Both clock and alarm work on old remote.
 - Q: What is the distant limit for new remote?
A: 164 ft.
 - Q: Can I control shades from other room?
A: Not recommend.
 - Q: How do I reset size limit?
A: Erase frequency setting and then reprogram it.
 - Q: How to hide unused channels?
A: Press left and right buttons for 5 seconds, select the channel# you need, and then press "favorite" button.
 - Q: How to unhide unused channels?
A: Press left and right buttons for 5 seconds, select channel 15, and then press "favorite" button
 - Q: How long is the warranty of remote and motor?
A: 1 year manufacture warranty
